

Project Statement

The expanded and renovated Hampton Soccer Association facility serves a large soccer field complex within the community. A complete interior and exterior renovation included adding public changing/toilet rooms and storage areas.

Clerestory window lighting was added to allow natural light into the facility and reduce energy costs. The public toilet rooms, concession stand and storage areas can all operate independently- allowing controlled access and function to each amenity of the facility.

This facility is highly used and designed as a durable and aesthetically pleasing park structure, integrated within a large park setting.
