

Project Statement

The Marriott Residence Inn– Cranberry was a new “Generation Five” prototype for Marriott’s all-suites hotel design. Primarily marketed to the extended-stay business and family traveler.

The four story facility includes; 96 hotel suites– including single and double bedroom units, many of which have upgraded amenities such as whirlpool tubs and fireplaces. In addition to the room suites the “Clubhouse” building includes; reception/check-in area, two large meeting rooms and a bar/buffet area. The Clubhouse also houses a large indoor pool, fitness room and sauna for it’s guests.

The hotels interior and exterior detailing enhances the “home residence” feeling of the guests during their extended stay. An outdoor sports-court, barbeque grills and plenty of green space complement the outdoor courtyard between the Clubhouse and Guest-room wings.
